# Professional and robust – Commander<sub>Pro</sub>

## Outstanding product features.

### STEINER High-Definition-Optics:

High-Definition-Optics developed by STEINER for pin sharp images whatever the weather. They are your guarantee that contours are always sharp and distinctly visible, even in poor light or at the onset of dusk.

### STEINER HD-stabilized compass:

The HD-stabilized compass makes it possible to take a bearing in even the most extreme conditions. The extremely stabilized compass is not only the largest ever to be fitted in binoculars, but its reticle makes it possible to calculate size or distance at any time, enabling the most accurate bearings even on high seas.

### STEINER ruggedness:

STEINER marine binoculars are known for their unique ruggedness. Makrolon® makes an important contribution here. It makes the housing even more shockproof and thus much more robust. As a result, STEINER binoculars are both compact and light.

Nitrogen-pressure system by 2-way valve technology enables perfect vision even in temperature variations between -40°C and +80°C. The optics are exceptionally effectively protected against knocks, as the prisms have "floating" mountings.

without compass

## Commander<sub>Pro</sub>

Sailing is your passion – and ours too. Precisely for this passion we have developed the unique Commander<sub>Pro</sub>.

The Commander<sub>Pro</sub> gives you the certainty that you will enjoy your sailing trip whatever the conditions. Its High-Definition-Optics make these exceptionally rugged professional binoculars the ideal companion even in bad weather conditions.

What is more, the Commander<sub>Pro</sub> combines the legendary STEINER ruggedness with the innovative ideas of the world market leader. Whether you are planning a day's sailing or a longer journey, with the Commander<sub>Pro</sub> you are perfectly equipped for all eventualities.
