

M.ZUIKO DIGITAL 25mm 1:1.8

- Large aperture for a nice depth of field effect
- Superb image quality for brilliant photos
- MSC compatible: High speed and silent AF
- Superb price performance ratio
- Interchangeable decoration rings

The must have prime lens

The M.ZUIKO DIGITAL ED 25mm 1:1.8 (50mm*) lens offers best optical performance, beautiful bokeh at open apertures and impressive close focussing capability. Compact and extremely well built, it features similar high end resolving power and shallow depth of field characteristics of the renowned M.ZUIKO DIGITAL ED 45mm 1:1.8 lens. The ultra bright 1:1.8 aperture gives you full control of depth of field and outstanding low light photography, further accentuated by Olympus' proprietary in body image stabilisation technology which counteracts camera shake for sharp images shot hand held at long shutter speeds. Ideal for a wide range of photography, this standard focal length prime lens reproduces a field of view that feels natural to the human eye, for perfectly balanced proportions and is therefore an essential addition to your kit. Available in black or silver to compliment your camera's finish. *35mm equivalent

Specifications

Focal Length

Focal length	25
--------------	----
